```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

The invention relates to an isolated DWARF12 (DWF12) mutant polypeptide.

The mutant polypeptide comprises at least 70 % sequence identity to the amino acid sequence of the DWF12 polypeptide given in the specification at positions 38-326 or 1-380, and having a mutation of at least one noncegon of the polypeptide corresponding to a region given in the specification. The mutant DWF12 polypeptide is useful in producing transgenic plants that display at least one altered blochemistry, structure or morphology. The transgenic plant can be used in plant breeding or incectly in agricultural production or industrial applications. The polymucleotide is useful in isolating or creating other mutant call gene alleles, in inhibiting or enhancing endogenous DWF12 gene expression, and in standard diagnostic assays as hybridisation probe or primer. This polymucleotide sequence represents the cDNA of the wild-type DWF12 locus of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   rargeagrarercereagagerreraregaerreragaacarraragragreeaaacea 600
                                     New isolated DWARF12 mutant polypeptide for producing transgenic plants displaying altered biochemistry, structure or morphology which are useful in plant breeding, in agricultural production or industrial applications.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      AAGAATGCCTCTTGTCTATGTTAAACTTTACAGTTATCAGATCTTCCGGGGACTTGCTTA

The invention relates to identifying a stress condition to which a plant cell has been exposed, comprising: (a) contacting nucleic acid representative of expressed polynucleotides in the plant cell with an array or probes representative of the plant cell genome; and (b) detecting a profile of expressed polynucleotides in the plant cell branacteristic of a stress response. The method is useful in the production of transgenic plants, cells and seeds and in producing production of transgenic plants, cells and seeds and in producing plants with increased tolerance to abiotic stress. The present sequence is that of an Arabidopsis thalians atress regulated gene (ABZ12196-ABZ17574) used in methods of the invention. Note: The sequence data for this patent is not represented in the printed specification but is based on sequence information supplied to Derwent by the European Patent Office
                                                                                                                                                                                                                                         Identifying a stress condition to which a plant cell has been exposed and producing plants with increased tolerance to these abiotic stresses.

This invention relates to a novel method for altering one or more plant characteristics. Specifically, it refers to identifying genes that are up characteristics. Specifically, it refers to identifying genes that are up conveniently of a conversegulated in transgenic plants everypeasing the heterodimeric step plant characteristics accordingly. The present invention describes generating transgenic plants for the production of growth regulators, enzymes, therapeutics, pharmaceuticals and animal feed products, where the altered plant characteristics are selected from increased yield or biomass, enhanced survival capacity, stress tolerance, plant architecture or physiology, altered endoreduplication, biochemistry, signal confiction, storage lipid mobilisation and/or altered photosynthesis, cach relative to the corresponding wild type plants. Accordingly, these each relative to the corresponding wild type plants. Accordingly, these carbon also be useful as positive or negative selectable markers during transformation of cells or tissues. The identified genes play a cole in a variety of biological processes such as DNA replication, cell wall biosynthesis, nitrogen and/or carbon metabolism or they function as transcription factors. This polymuclectide sequence is thale cress cDNA curenciption factor, given in an exemplification of the invention.
                                                                                                                                                                             Altering plant characteristics, useful for producing plants for enzyme c
pharmaceutical production comprises modifying in a plant, expression of
one or more nucleic acids and/or modifying level or activity of one or

The present sequence is a full-length cDNA encoding BnPK-2, a novel canola protein kinase stress-related polypeptide (PKSRP). The CDNA was identified on the baais of homology to Physcomitralla patens PK-3 (see ACC57962) and PK-10 (see ACC57966) sequence. BnPK-2 is an example of PKSRPs of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                246 ATAAGTTACATGGCGGAGCGAGTTGTCGGTACAGGCTCCTTCGGGATAGTGTTCCAGGCG 305

The present sequence is a full-length cDNA encoding GmPK-3, a novel soybean protein kinase stress-related polypeptide (PKSRP). The cDNA was identified on the basis of homology to Physcomitrella patens PK-3 (see ACC57962) and PK-10 (see ACC57966) sequence. GmPK-3 is an example of PKSRPs of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New protein kinase stress-related polypeptide coding nucleic acid, useful for producing transgenic plants with an increased tolerance to an environmental stress, e.g. high salinity, as compared to a wild type variety of the plant.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  395

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         396 recreatrice de recentrate de la rece                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    셤

The present sequence is a full-length cDNA encoding GmPK-1, a novel soybean protein kinase stress-related polypeptide (PKSRP). The CDNA was identified on the basis of homology to Physcomitrella patens PK-3 (see ACC57962) and PK-10 (see ACC57966) sequence. GmPK-1 is an example of PKSRPB of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                      New protein kinase stress-related polypeptide coding nucleic acid, useful for producing transgenic plants with an increased tolerance to an environmental stress, e.g. high salinity, as compared to a wild type variety of the plant.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             269

The invention relates to protein kinases, especially calcium-dependent phosphorylase kinase (CDPK) and glycogen synthase kinase-3 (GSK-3). The polypeptides having GSK activity can be expressed by standard recombinant cathology. The polymucleotides encoding the polypeptides are useful for including cDNAs and genes encoding homologous proteins from the same or cisolating cDNAs and genes encoding the monological screening of cDNA expression cother plant species, for immunological screening of cDNA expression cother plant species, for immunological screening of cDNA expression synthase kinase polypeptides are present at higher or lower levels than command or in cell types or developmental stages in which they are commanded to mormally found. The polynucleotides are also useful as probes for genetically and physically mapping the genes that they are part of, and as markers for traits linked to those genes. The polypeptides are useful for altering the level of expression of GSK-3 in a transformed host cell. The present sequence represents a wheat GSK-3 cDNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö

The present invention describes kinase polypeptides (I) such as a calcium

```
cdependent phosphorylase kinase polypeptide comprising a sequence of 101, 623, 157 or 111 (see ABP53629 to ABP5362) amino acids, and a glycogen synthase kinase polypeptide comprising all or a portion of a sequence of 410, 105, 399 or 402 (see ABP53631 to ABP53636) amino acids. (1) is useful for immunological screening of CDNA expression libraries, and for preparing antibodies against the polypeptides, where the antibodies would be useful for detecting (1) in situ or in vitro, in cell extracts.

CC buseful for detecting (1) in situ or in vitro, in cell extracts.

CC Nucleic acids (11) encoding (1) can be used to isolate CDNAs and genes encoding homologous proteins from the same or other plant species. (11) can also be used for creating transgenic plants in which (1) is present developmental stages in which they are not normally found. (11) are useful as probes or primers. The polymodicatides may be used as probes or primers. The polymodicatides may be used as part of and used as markers for traits linked to those genes that they are a part of an used in plant breeding in order to those genes. The information can be used in plant breeding in order to develop lines with desired

CC phenotypes. The present sequence encodes a glycogen synthase kinase from
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SQUENCE 13, Application US/09347801
Patent No. 6262345
GENERAL INFORMATION:
TENDERAL INFORMATION:
APPLICANT: Allen, Steve
TITLE OF INVENTION: Plant Protein Kinases
FILE REFERENCE: BB-1171
CURRENT FILING DATE: 1999-07-02
EARLIER FILING DATE: 1999-07-02
EARLIER APPLICATION NUMBER: 60/092,438
EARLIER PILING DATE: July 10, 1998
NUMBER OF SEQ ID NOS: 23
SOFTWARE: Microsoft Office 97
SOFTWARE: Microsoft Office 97
LENGTH: 1429
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          TYPE: DNA
